

Syllabus (For referenc only)

Course	International Training Course for Nurse_1-Month	Total hrs	150.00
Purpose	Understand nursing practice and healthcare systems related to carbon ion radiotherapy(CIRT).		
Objectives	1. Understand the characteristics of CIRT. 2. Understand the overview of nursing in CIRT. 3. Understand nursing support for the decision-making of outpatients through initial consultations and second opinions. 4. Understand nursing care from the preparation to the completion of CIRT for patients in the treatment facilities and inpatient ward. 5. Understand general principles of physics and biology related to CIRT.		
Lecture #	Contents	Instructional method	
	Orientation		
B-1	Introduction to CIRT	Lecture & video viewing	
B-2	Nursing in CIRT	Lecture	
B-3	Outpatient Nursing	Lecture & observation	
B-4	Nursing in CIRT Facilities	Lecture & observation	
B-5	Ward Nursing	Lecture & observation	
B-14	Physics-0: facility tour	Observation	
B-15	Physics-1	Lecture	
B-16	Biology	Lecture	
O-1-1~12	Outpatient Nursing	Clinical observation	
O-2-1~15	Nursing in CIRT Facilities	Clinical observation	
O-3-1~8	Nursing Care for Hospitalized Patients	Clinical observation	
	Conclusion		
Remarks	Participants need to understand the following directions. 1. Participants are strictly prohibited from performing any clinical procedures, nursing tasks, or other medical interventions. 2. Clinical observation is allowed only when the patient has given consent. 3. Participants may attend the following conferences. • Cancer board • Treatment discussion 4. The training content will be implemented in a way that ensures the training objectives can be achieved.
